Practitioner's Docket No. END920000111US1

PATENT**IN THE UNITED STATES PATENT AND TRADEMARK OFFICE**

Patent Number: US 6,886,134 B1

Issued: 04/26/2005

Name of Patentee: International Business Machines Corporation

Title of Invention: SYSTEM AND METHOD FOR PROVIDING AN APPLICATION NAVIGATOR
CLIENT MENU SIDE BAR

Commissioner for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

**REQUEST FOR CERTIFICATE OF CORRECTION OF PATENT
FOR PTO MISTAKE (37 C.F.R. § 1.322(a))**

NOTE: "If such a request for correction was incurred through the fault of the United States Patent and Trademark Office (Office), and is clearly disclosed in the records of the Office, and is accompanied by documentation that unequivocally supports the patentee's assertion(s), a Certificate of Correction will be expeditiously issued. Such supporting documentation can consist of relevant photocopied receipts, manuscript pages, correspondence dated and received by the Office, photocopies of Examiners' responses regarding entry of amendments, or any other validation that supports the patentee's request so that the request can be processed without the patent file." Notice of September, 17, 2002, 1262 OG 96.

- Attached, in duplicate, is PTO/SB/44 (also Form PTO-1050), with at least one copy being suitable for printing.

NOTE: Form PTO-1050 (or PTO/SB/44), using the column and line number in the printed patent, should be used exclusively regardless of the length or complexity of the subject matter. M.P.E.P. § 1485, 7th ed.

NOTE: The patent grant should be retained by the patentee. The PTO does not attach the certificate of correction to the patentee's copy of the patent. The patent grant will be returned to the patentee if submitted. M.P.E.P. § 1485, 8th ed.

- The exact page and line number where the errors are shown correctly in the application file are: Applicant's Amendment mailed 27 July 2004 and received by USPTO on 30 July 2004 (attached), Page 4, Line 24

NOTE: The exact page and line number where the errors occur in the application file should be identified on the request. However, on form PTO/SB/44, only the column and line number in the printed patent should be used. M.P.E.P., § 1480, 8th Edition.

ASSIGNMENT

Whereas, I

(1) Stanley P. Cason City of Johnson City
County of Broome and State of New York

have invented certain improvements in

**System and Method for Providing an Application Navigator
Client Menu Side Bar**

and have executed a United States patent application therefor on

(1) Sept 6, 2000,

And whereas, INTERNATIONAL BUSINESS MACHINES CORPORATION, a corporation of New York, having a place of business at Armonk, New York 10504, (hereinafter called IBM), desires to acquire the entire right, title and interest in the said application and invention, and to any United States and foreign patents to be obtained therefor;

Now therefore, for a valuable consideration, receipt whereof is hereby acknowledged, I the above named hereby sell, assign, and transfer to IBM, its successors and assigns, the entire right, title and interest in the said application and invention therein disclosed for the United States and foreign countries, and all rights of priority resulting from the filing of said United States application, and I request the Commissioner of Patents to issue any letters Patent granted upon the invention set forth in said application to IBM, its successors and assigns; and I hereby agree that IBM may apply for foreign Letters Patent on said invention and I will execute all papers necessary in connection with the United States and foreign applications when called upon to do so by IBM.

(1) Signed at Endicott, New York

AMENDMENT

Honorable Commissioner
for Patents
P.O. Box 1450
Alexandria, VA 22313-1450

Sir:

Responsive to the Office action of 29 March 2004,
please amend the above-identified application as follows:

In the Claims

The status of claims in the case is as follows:

1 1. [Currently amended] A graphical user interface,
2 comprising:

3 a navigation frame;

4 a content frame;

5 a temporary data frame;

6 said navigation frame including a customizable side bar
7 initialized to display headers only, each said header
8 characterized by a division tag including header
9 indicia and null indicia;

10

11 dynamic HTML used by a navigator responsive to user
12 input and to said division tag to change data presented
13 in said side bar without communicating with a remote
14 server to selectively expand said side bar to display
15 in said navigation frame selection item indicia

16 corresponding to a header, said selection item indicia
17 characterized by said division tag with said header
18 indicia and item distinctive indicia replacing said
19 null indicia; and

20 said navigator responsive to user selection of said
21 selection indicia for communicating with said remote
22 server to access content data for display in said
23 content frame.

1 2. [Currently amended] A graphical user interface,
2 comprising:

3 a navigation frame;

4 a content frame;

5 a temporary data frame;

6 said navigation frame including a plurality of header
7 boxes, each said header box characterized by a division
8 tag including header indicia and null indicia;

9 a box selector;

10 said header boxes being responsive to selector

11 positioning and actuation for toggling between expanded

12 and unexpanded modes without communicating with a

13 remote server, said expanded mode displaying included

14 item boxes and said unexpanded modes not displaying

15 said item boxes; each said item box characterized by a

16 division tag including said header indicia of its

17 header box with said null indicia replaced by item

18 distinctive indicia;

19 said items boxes being responsive to selector

20 positioning and actuation for communicating with said

21 remote server for updating said content frame;

22 dynamic HTML used to control said navigator frame

23 responsive to user input to toggle header boxes

24 responsive to said division tags between said expanded

25 and unexpanded modes in said side bar without having to

26 communicate with said remote server; and

27 said temporary data frame for holding current data in

28 said interface, directing calls to an application, and

29 making return data available to said application.

1 3. [Currently amended] Method for presenting a navigation
2 frame in a browser window, comprising the steps of:

3 loading to said browser navigation frame header
4 information and item information for expanding
5 individual header tabs, said header information for a
6 frame header characterized by a division tag including
7 header indicia and null indicia, and said header
8 information for an item characterized by a division tag
9 including header indicia of its header and item
10 distinctive indicia replacing said null indicia;

11 initializing said browser window to display only said
12 header tabs;

13 responsive to user selection of an individual header
14 tab and to said division tags, executing dynamic html
15 to selectively toggle said individual header tab
16 between expanded and unexpanded modes without accessing
17 a remote server, said expanded mode including the
18 display of included item tabs and said unexpanded mode

19 not including said display;

20 responsive to user selection of a target item tab,

21 communicating with said server to refresh a content

22 frame in said browser window; and

23 operating a temporary data frame in said browser for

24 holding current data, directing calls to a remote

25 server application, and making return data available to

26 said application.

1 4. [Previously amended] The method of claim 3, further

2 comprising the step of:

3 defining each said tab as a dynamic HTML division

4 capable of being moved relative distances and

5 selectively displayed and hidden in said display.

1 5. [Previously amended] The method of claim 4, further

2 comprising the steps of:

3

4 upon initial load, displaying all header tabs collapsed

5 and all menu tabs hidden; and

6 responsive to selection of a target header tab,
7 selectively moving, displaying, and hiding said tab
8 with respect to other tabs in said navigation frame.

1 6. [Canceled]

1 7. [Currently amended] A program storage device readable
2 by a machine, tangibly embodying a program of instructions
3 executable by a machine to perform method steps for
4 presenting a navigation frame in a browser window, said
5 method steps comprising:

6 loading to said browser navigation frame header
7 information and item information for expanding
8 individual header tabs, each said frame header
9 characterized by a division tag including header
10 indicia and null indicia, and each said item
11 characterized by a division tag including header
12 indicia of its frame header and item distinctive
13 indicia replacing said null indicia;

14 responsive to user selection of an individual header
15 tab and to said division tags, executing dynamic html
16 to selectively toggle said individual header tab
17 between expanded and unexpanded modes without
18 communicating with a remote server, said expanded mode
19 including the display of included item tabs and said
20 unexpanded mode not including said display;

21 responsive to user selection of a target item tab,
22 communicating with said server to refresh a content
23 frame in said browser window; and

24 operating a temporary data frame in said browser for
25 holding current data, directing calls to a remote
26 server application, and making return data available to
27 said application.

1 8. [Currently amended] A program storage device readable
2 by a machine, tangibly embodying a program of instructions
3 executable by a machine to perform method steps for
4 presenting a navigation frame in a browser window, said
5 method steps comprising:

6 loading to said browser navigation frame header

7 information and item information for expanding
8 individual header tabs, said header information
9 including a division tag including header indicia and
10 null indicia, and said item information including a
11 division tag with said header indicia of its frame
12 header and with item distinctive indicia replacing said
13 null indicia;

14 responsive to user selection of an individual header
15 tab and to said division tags, executing dynamic html
16 to selectively toggle said individual header tab
17 between expanded and unexpanded modes, said expanded
18 mode including the display of included item tabs and
19 said unexpanded mode not including said display;

20 defining each said tab as a dynamic HTML division
21 capable of being moved relative distances and
22 selectively displayed and hidden in said display;

23

24 upon initial load, displaying all header tabs collapsed
25 and all menu tabs hidden;

26 responsive to selection of a target header tab,
27 selectively moving, displaying, and hiding said tab

28 with respect to other tabs in said navigation frame
29 without communicating with a remote server; and

30 responsive to user selection of a target item tab,
31 communicating with said server to refresh a content
32 frame in said browser window.

1 9. [Currently amended] A computer program product or
2 computer program element for executing method steps for
3 presenting a navigation frame in a browser window, said
4 method steps comprising:

5 loading to said browser navigation frame header
6 information and item information for expanding
7 individual header tabs, said header information
8 including a division tag including header indicia and
9 null indicia, and said item information including a
10 division tag with said header indicia of its frame
11 header and with item distinctive indicia replacing said
12 null indicia;

13 responsive to user selection of an individual header
14 tab and to said division tags, executing dynamic html

15 to selectively toggle said individual header tab
16 without communicating with a remote server between
17 expanded and unexpanded modes, said expanded mode
18 including the display of included item tabs and said
19 unexpanded mode not including said display;

20 defining each said tab as a dynamic HTML division
21 capable of being moved relative distances and
22 selectively displayed and hidden in said display;

23

24 upon initial load, displaying all header tabs collapsed
25 and all menu tabs hidden;

26 responsive to selection of a target header tab,
27 selectively moving, displaying, and hiding said tab
28 with respect to other tabs in said navigation frame;
29 and

30 responsive to selection of a target item tab,
31 communicating with said server to refresh a content
32 frame in said browser window.

1 10. [Previously presented] The program storage device of
2 claim 7, said method further comprising:

3 defining each said tab as a dynamic HTML division
4 capable of being moved relative distances and
5 selectively displayed and hidden in said display.

1 11. [Previously presented] The program storage device of
2 claim 10, said method further comprising:

3

4 upon initial load, displaying all header tabs collapsed
5 and all menu tabs hidden; and

6 responsive to selection of a target header tab,
7 selectively moving, displaying, and hiding said tab
8 with respect to other tabs in said navigation frame.

REMARKS

The above amendment and these remarks are responsive to the Office Action of Examiner Thanh T Vu, dated 29 March 2004.

35 U.S.C. 103

Claims 1 and 8-9 and have been rejected under 35 U.S.C. 103(a) over Dynamic HTML In Action, by William J. Pardi and Eric M. Schurman (hereafter, Pardi).

The Examiner refers to Chapter 4 of Pardi for its teaching of a navigation frame and to Chapter 13 for expanding and collapsing a header.

Applicants have amended claims 1 and 8-9 to recite the

specific programming techniques used to implement dynamic client-side menus by structuring division tags to include header indicia and null indicia, in the case of headers, and item distinctive indicia in the case of items. This division tag structure is described by Applicants in their specification at page 67, line 9 to page 76, with particular reference to lines 108, 112 of Table 6, where the div ID=D0000 name for a header tag includes D00 as the header indicia and 00 as the null indicia, and div ID=D0001 for an item tag includes the header indicia D00 for its header and 01 as the item distinctive indicia. Similarly, each header and item are characterized by a div ID= tag of the structure now claimed. These tags are used by the code of lines 1-92 to implement dynamic client-side menus.

This specific structure of division tags is not taught by Pardi in the context of implementing dynamic client-side menus.

Claims 2-5, 7, and 10-11 have been rejected under 35 U.S.C. 103(a) over Pardi in view of Rice (U.S. Patent 6,486,891).

Applicants have amended claims 2-3 and 7, and claims 4-

5 and 10-11 depend from claims which have been amended as previously discussed with respect to Pardi to recite the specific structure of division tags provided by applicant's invention to achieve dynamic client-side menus. Rice does not teach this structure of division tags.

Applicant requests that claims 1-5 and 7-11 be allowed.

SUMMARY AND CONCLUSION

Applicants urge that the above amendments be entered and the case passed to issue with claims 1-5 and 7-11.

The Application is believed to be in condition for allowance and such action by the Examiner is urged. Should differences remain, however, which do not place one/more of the remaining claims in condition for allowance, the Examiner is requested to phone the undersigned at the number provided below for the purpose of providing constructive

assistance and suggestions in accordance with M.P.E.P. Sections 707.02(j) and 707.03 in order that allowable claims can be presented, thereby placing the Application in condition for allowance without further proceedings being necessary.

Sincerely,

S. P. Cason
